

Monitor Arms - A Solution for Crowded Computer Stations!

Why should the computer monitor take up work surface space? Our Monitor Arms raise the CRT screen to an ergonomically proper, comfortable height/depth and opens up the most valuable area, in a computer station, the one directly in front of the computer operator!

Part #K8831 "Monitor Arms"

Monitor Arms rotate a full 360 degrees, have a 50lb capacity, tilt adjustment, three position height adjustment, pullout keyboard support, flexible retractability, built-in wire management and heavy duty work surface clamp(no holes required for attachment). The unit is KD and can be shipped via UPS.
